SKILLS SUMMARY

- Languages: C++, Java, C, Python
- Frameworks: HTML and CSS
- Tools/Platforms: AWS (EC2, S3, Lambda, RDS, IAM), GitHub, Docker, MySQL, Linux
- Soft Skills: Problem-Solving, Continuous Learner, Project Management

PROJECTS

Deploy a Web App using EC2 | [GITHUB](#)

Aug 2025-Sept 2025

- Deployed a scalable web application on AWS using EC2, Nginx (reverse proxy), RDS (MySQL), and S3 for storage, with secure access via IAM roles and Security Groups.
- Implemented Load Balancer and Auto Scaling to efficiently manage high and variable user traffic.
- Monitored and optimized server performance using CloudWatch and right-sizing techniques (Tech: EC2, S3, RDS, IAM, ELB, Auto Scaling, React.js, Node.js, MySQL).

Inter-Process-Communication-IPC-Debugger | [GITHUB](#)

Feb 2025-Mar 2025

- Formulated a Python-based debugging tool to monitor, visualize, and debug Inter-Process Communication (IPC) mechanisms.
- Constructed a graphical user interface (GUI) for real-time visualization of pipes, message queues, and shared memory segments.
- Engineered a deadlock detection module using NetworkX for graph-based analysis and visualization of process interactions.

Automated Backup System | [GITHUB](#)

Nov 2024-Dec 2024

- Designed and automated a periodic backup system using AWS Lambda, S3, and CloudWatch Events with versioning and lifecycle.
- Configured SNS email notifications for backup success or failure and secured the workflow using IAM permissions.
- Optimized the backup process with scheduled triggers, controlled access, and cost-effective storage Management (Tech: Lambda, S3, CloudWatch, SNS, IAM, Python).

TRAINING

Linux & Container Deployment Training (Podman + NGINX)

Jun 2025-Jul 2025

- Gained hands-on experience in deploying containerized applications using Podman on RHEL, including installation, configuration, and lifecycle management.
- Implemented a fully functional NGINX web server inside a Podman container with host-mounted persistent storage and real-time content updates.
- Configured systemd-based automation to enable container auto-start on system boot, ensuring reliability, persistence, and production-like deployment.

CERTIFICATES

- AWS Essential's: A Complete Beginner's Guide | UDEMY May 2025
- Privacy and Security on Social Media | NPTEL Apr 2025
- AWS Academy Cloud Foundation | AWS Mar 2025
- Java, C, Cpp, DSA | IamNeo Jan 2025

ACHIEVEMENTS

- Strengthened cloud security by configuring IAM roles, Security Groups, and S3 policies aligned with best practices. | LPU Jun 2025
- Cloud Practitioner Essentials, Architecting on AWS, and AWS Cloud Quest (Cloud Practitioner / Solutions Architect / Serverless Developer) | LPU Jan 2025

EDUCATION

- Lovely Professional University Jalandhar, Punjab
Bachelor of Technology - Computer Science and Engineering: cgpa-7.0 Aug 2023-Jun 2027
- CS DAV Public School Motihari, Bihar
Intermediate: cgpa-7.6 Apr 2021-Mar 2023
